

Perfecting the Art of Landing

There is more to landing well, consistently, than meets the eye. We'll review setting up the perfect glidepath, adjusting for wind and how to flare for consistently good touchdowns and rollouts. We'll study the high approach, low approach, balked approach and bad bounces, all in an effort to avoid them.

Directions: Located at the south end of the airport near the self-serve fuel.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
